

Comet™

A Saturn Software, Inc. Product

International and Domestic Rights Licensing System

Comet™ automates the rights licensing activities of a production or distribution company. In addition to being a repository of data, it produces a vast array of reports and documents with one-button ease. The program concurrently services the data and workflow needs of multiple departments, including contracts, sales, marketing, finance and distribution.

Customized Rights and Territories

Comet's 3-level rights hierarchy is user definable and rights at the highest level can be added to a deal with a mixture of default include/exclude settings at the subsidiary levels. Territories are user definable and can be set to any combination of parent/child and conflict relationships. A Territory Group filter provides an easy entry method for fast contract construction.

SALES AND DISTRIBUTION

Comet was designed to maximize the effectiveness of sales activity from negotiation through provisional sale, deal memo and approved contract.

Multiple location operation means that deals may be entered, printed, checked and executed off-site without processing delay. Synchronization or Internet Web Browser Access provides Flexibility On The Road.

Sales Tools and Reports

- Run instant, pick-n-mix Availability Reports by title or territory, showing rights owned and events-driven, daisy-chained holdback, release and exclusivity windows for confirmed and provisional sales.
- Create searchable Sales Histories and Expiring License Reports by title, market, customer, territory and right category with financial details exportable to Microsoft Word™ or Excel™.
- Identify re-sale opportunities as they arise with Expiring Licenses Reports.
- Integrate Ask and Take prices with Availability Reports and create sales forecasts for management.
- Create interdepartmental workflow for Contract Administration and Sales Order Processing of invoice, tape and publicity at the press of a button.

CONTRACT ADMINISTRATION

General

- Highlight rights, clearance, censorship or approval Restrictions via automatic Pop-up Warnings.
 - Draft agreements and track amendments, revisions and signature with Follow-up Reminders where required.
 - Generate contract packages in domestic and international markets for multiple right categories and Record Exclusions, Exceptions, Exclusivities and Windows.
 - Construct contracts from user-defined Standard Deal Templates, changing titles, fees, windows and other terms as appropriate.
 - Add and delete Standard Contractual Clauses with one-click and track revisions on screen.
- ### Sales
- Flag Provisional Sales, sub-distributor and third-party negotiated deals

Pre-Sales Negotiation Support

- Pitch and Negotiate the sale of a title assisted by interest tracking summaries by buyer, title and territory and on-screen alarms and calendars.
- Order VHS cassettes, screenplays and treatments to be sent in real time.

SYSTEM SUPPORT

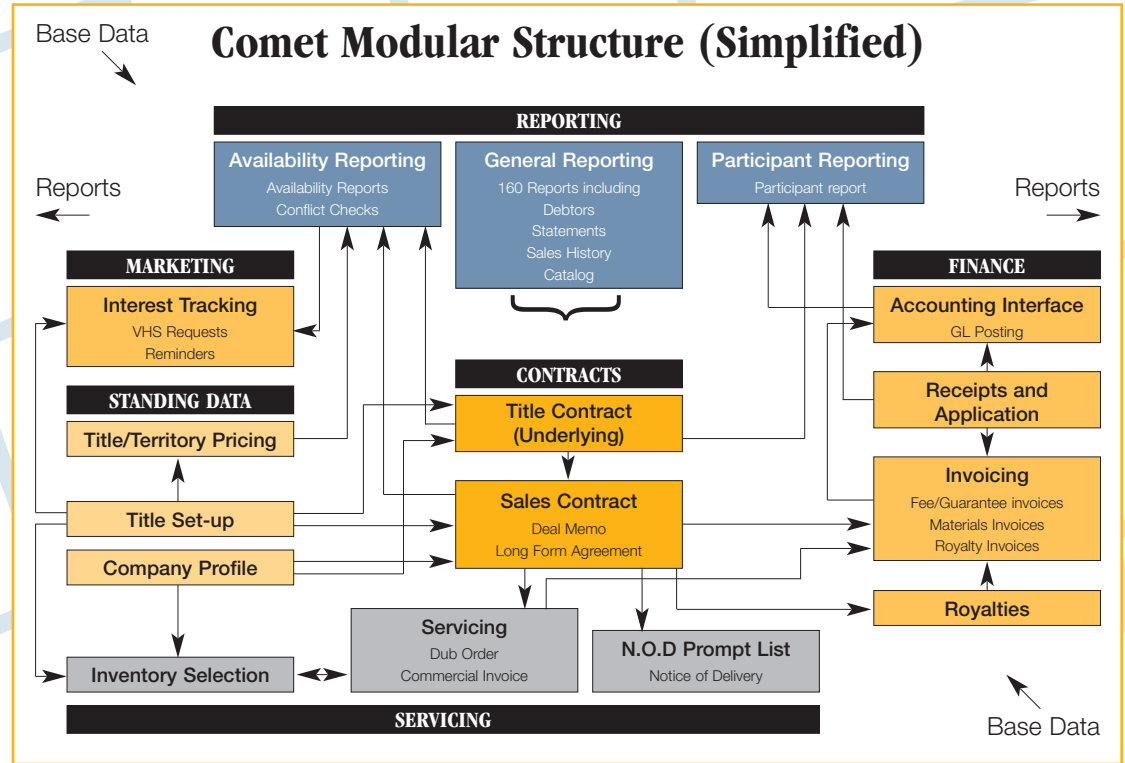

Design

Comet is designed to integrate with the most powerful and advanced desktop and server software available: Microsoft Office with Microsoft SQL Server. Comet

is a true client/server program capable of dozens of concurrent users with gigabytes of data. Users with different operating systems and desktop software may concurrently use Comet. SQL Server data is an open architecture, allowing users to create and run reports from a variety of standard software including Microsoft Excel™ and various report writers. Access to Comet data by the Internet can be secured by the login permissions granted.

Security may be set on a user or group basis:

- Internet capable.
- Program updates may be downloaded from the Saturn Web site.
- Saturn provides current exchange rates for 40 countries, which are then utilized by Comet.

- Remote access possible via a standard internet, virtual private network, or direct telephone connection.
- Easy maintenance, upgrades, and support.
- Software updates available over the web.

Operating systems supported*

Windows 98 (all releases) SP-1
 Windows Millennium Edition
 Windows NT 4.0 SP-4+
 Windows 2000 SP-1+
 Windows XP Home and Professional

Desktop Application Environment*

Office™ 97 Standard and Professional SP-2+
 Office 2000 Standard and Professional SP-1+
 Office XP Standard and Professional
 Comet integrates with ACT!™ 4, 5, 6 and 2000
 SQL Server 7 and 2000 (optional)

* Current at February 2003. Office, Windows, Windows NT, and Excel are trademarks of Microsoft Corporation. ACT! is a trademark of Interact Commerce Corporation. Pentium is a trademark of Intel Corporation.

Support

Saturn Software, Inc. offers full customer support in the form of installation, training, consultancy, customization and technical advice.

- Helpdesk support is available 24 hours a day from our Los Angeles and London offices, by telephone and e-mail.
- On-site training and consultancy to suit your schedule.
- Responsive customization, software support and technical advice.
